MEHRAB HOSSAIN

SOFTWARE DEVELOPER

dev.mehrabhossain@gmail.com | 01644-935598 | Portfolio | LinkedIn | Github

PROFESSIONAL SUMMARY

Software Developer with professional experience building and maintaining full-stack applications using JavaScript/TypeScript, MERN, and Next.js. Backend-heavy engineer with hands-on experience in REST APIs, authentication, RBAC, real-time communication, Redis, BullMQ, Docker, payment integration, webhooks, caching, rate limiting, RAG, and AI-assisted development. Focused on understanding business problems, learning the underlying concepts, and building maintainable solutions with attention to user experience and performance.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication, RBAC, WebSockets, Webhooks

Databases & Infrastructure: MongoDB, Mongoose, Redis, BullMQ, Docker

Engineering: API Design, Caching, Rate Limiting, Payment Integration, Monorepos, Background Jobs

AI: RAG, AI Integration, LangChain, Google Gemini, Vector Search

Tools & Platforms: Git, GitHub, Vercel, Netlify, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

IMS Systems | Junior Fullstack Developer Dec 2025 – Present | Remote

- Build and maintain enterprise software solutions using MERN and Next.js in a remote software development environment.
- Made a company share purchasing portal and stakeholder stake-management workflows with separate admin and investor access control and integrated Stripe payment functionality within the application.
- Convert Figma designs into responsive Next.js interfaces with attention to usability, component structure.

SELECTED PROJECTS

Campus Connect Repository | Live

University social networking platform built as a monorepo with a Next.js frontend, Express REST API, and AI/RAG service.

- Built around authentication, profiles, social feed, posts, comments, real-time messaging, notifications, file uploads.
- Worked with Express.js, TypeScript, MongoDB, Redis, BullMQ, Socket.IO, Cloudinary, Docker, and JWT authentication.
- Integrated AI service using LangChain, Google Gemini,Vector Search, Embeddings, and LlamaParse for RAG.
- Implemented a pipeline covering PDF/JSON ingestion, chunking, embedding, vector retrieval, context-aware AI responses.

Atenier Repository | Live

Multi-tenant real estate SaaS platform providing isolated public property storefronts and agency management dashboards.

- Built with Next.js App Router, TypeScript, MongoDB/Mongoose, Cloudinary, Tailwind CSS, Zod, React Hook Form, JWT.
- Implemented tenant-oriented product architecture covering property management, agency branding, team/agent management, leads, platform administration, and public property pages.
- Designed server-side tenant isolation around organizationId and verified sessions, with organization-aware service/action access controls and role-based permissions.

Make Your Dev CV Repository | Live

AI-powered developer CV and job-matching platform designed to help developers build, optimize, and tailor professional CVs

- Built an AI-powered CV platform with structured profile management, customizable templates, and PDF/DOCX generation.
- Implemented AI CV optimization, job matching, and contextual editor assistance using OpenRouter.
- Designed an AI workflow for CV content composition and personalized job recommendations, with user-controlled review.

EDUCATION

Bangladesh University of Professionals (BUP)

B.Sc. in Computer Science & Engineering | Expected 2029 | 2nd Year
